## PROJECTS

---

### [BazaarX](#) - Buy & Sell Marketplace

[Source Code](#)

- Built a scalable marketplace platform where users can **buy and sell any product**, functioning as both buyers and sellers.
- Implemented **real-time chat feature** enabling buyers to communicate directly with sellers for product inquiries.
- Created **Seller Dashboard** to manage listings, track orders, update product details, and monitor sales analytics.
- Integrated **payment system** to facilitate secure and smooth transactions.
- Designed a clean, responsive UI ensuring a smooth buying and selling experience for all users.

### [Home4Paws](#) - Pet Adoption Portal

[Source Code](#)

- Developed a full-stack pet adoption platform enabling users to browse, request adoption, and chat with pet owners in real time.
- Implemented **real-time chat system** between adopters and pet owners using Socket.io for seamless communication.
- Built **Owner Dashboard** to manage pets, view adoption requests, accept/reject applications, and track interactions.
- Designed and integrated **adoption request workflow** with secure user authentication and role-based access control (RBAC).

## TECHNICAL SKILLS

---

**Languages:** TypeScript, JavaScript, Python, Java

**Frameworks:** Next.js, React

**Frontend technologies:** React Query, React Router, Redux, HTML5, CSS3, TailwindCSS

**Backend technologies:** NodeJS, Express.js, MongoDB, Next Auth, Postman, Docker, json-web-token

**Other technical skills:** Linux, Git, GitHub, Bash

## EDUCATION

---

**Noida Institute of Engineering and Technology**

**2023 - 2027**

*Bachelor of Technology, Computer Science and Engineering*

*Noida, India*

- CGPA: 8.3/10

## HACKATHONS

---

- Indradhanu Hackathon – International Grand Challenge 2025–2026 (Pimpri Chinchwad College of Engineering)  
Cleared the **screening/shortlisting round** among multiple competing teams by presenting a strong project concept and technical approach.
